## Letter from the President

Steve Lonneman

OESI members are committed to protecting the Ohio environment. Together, they operate and maintain 11 RCRA-permitted hazardous waste management facilities in Ohio. Our members safely receive and handle about 70% of the hazardous waste managed commercially in Ohio. Hundreds of other Ohio businesses and industries rely on our RCRA facilities to provide them with safe and reliable hazardous waste management and disposal services such as waste incineration, fuel blending, resource recovery and recycling, wastewater treatment, deepwell injection, waste stabilization, land disposal, and more.

Associate OESI members provide a range of other environmental services that are also vital to the Ohio economy and environment, such as spill cleanup and remediation, training and education, emission testing, waste transportation, legal services, emergency response, public communications, and insurance.

In 2007, OESI members continued their efforts to inform and educate state and local officials about the vital role our industry plays in the Ohio industrial economy. This was especially important in 2007 because of the change in the administration to Democratic leadership. We will work throughout 2008 to continue our outreach efforts in this key area.

A priority for OESI this year will be the subject of background investigations. Each year, our members with RCRA-permitted hazardous waste facilities are required to pay up to \$5,000 for their background investigations. Other Ohio businesses and organizations where background checks are required are not financially burdened in this way; their background checks are performed by the Attorney General's Bureau of Criminal Investigations at a cost of only \$25 per person. OESI hopes to reduce the financial burden and time requirements on its members by focusing attention on this matter.

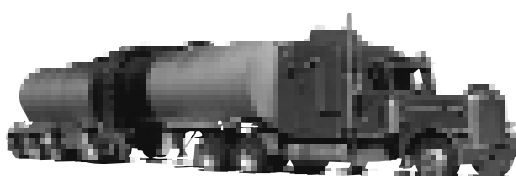

During 2008, OESI members and associate members will remain a vital and integral part of Ohio's economy, as they continue to provide safe and environmentally sound waste management services to all Ohioans.

If you have any questions about our organization, its members, or about our industry, please don't hesitate to contact me or our executive director, Tom Pappas.

Sincerely,

A handwritten signature in black ink, appearing to read 'Steve Lonneman', written over a light blue background.

Steve Lonneman  
OESI President  
Vickery Environmental, Inc.  
A Waste Management Co.

# About OESI

## Description

Ohio Environmental Service Industries (OESI) is a trade association of Ohio's commercial hazardous waste management facilities and associated businesses. Hazardous waste management members provide waste storage, treatment, disposal and recycling services; associate members provide other supporting services related to the hazardous waste industry.

OESI holds six meetings each year in Columbus or at a member facility to discuss legislative, regulatory and communication issues affecting the industry. The Association advocates before the state legislature and Ohio Environmental Protection Agency (OEPA) regarding legislation or regulations pertinent to member facilities.

## Active Members

OESI active members use state-of-the-art methods for recycling, blending, destroying or disposing of hazardous wastes. They advocate chemical recovery, reuse and recycling wherever possible, as well as sound methods for treating and disposing of hazardous wastes. Members' operations are primarily regulated by the federal Resource Conservation and Recovery Act (RCRA) through permits issued by the OEPA.

The services offered by OESI active members include the following:

- Carbon Adsorption
- Chemical Precipitation
- Cyanide Destruction
- Commercial Laboratory Services
- Deepwell Injection
- Distillation
- Energy Recovery
- E-Waste Recycling
- Fuel Blending
- Incineration
- Training & Consulting
- Lab Packs
- Landfill Disposal
- Oil Recycling
- PCB Waste Management
- Solids Processing
- Solvent Recovery
- Thin-Film Evaporation
- Waste Stabilization
- Waste Recycling
- Wastewater Treatment
- Transportation

Our active members comprise the governing body of OESI. Each active member company has one vote.

# About OESI

## Associate Members

Our associate members are firms that supply goods or services related to the overall sound management of hazardous wastes.

Services offered by our associate members include the following:

- Drum and Bulk Container Management (Cleaning, Maintenance and Reconditioning)
- Emergency Response
- Environmental Insurance & Risk Management
- Environmental Legal Counsel
- Environmental Communications
- Environmental Consulting and Engineering
- Fire Suppression Equipment
- General Legal Services
- Government/Community Relations
- Hazardous Material Equipment
- Industrial Cleaning
- Industrial Hygiene
- Personal Protective Apparel
- Regulatory/Legislative Lobbying
- Remedial Investigations
- Spill Cleanups
- Testing and Monitoring
- Training, Education, CHMM Certification
- Truck Cleaning
- Waste Transportation

# About OESI

## Mission Statement

- To provide a forum for our members to promote professional and environmentally sound hazardous waste management practices, including chemical recycling, treatment, storage and disposal for the protection of human health and the environment.
- To promote communication with the public regarding sound hazardous waste management practices.
- To maintain close liaison with the Ohio Legislature, OEPA, and other government agencies, and to be actively involved in the development of hazardous waste laws and regulations.
- To provide a mechanism to collect, disseminate, discuss, consider and express opinions on laws and regulations which would have an impact on recycling, treatment and disposal practices.
- To help members inform their communities about the economic and environmental benefits of professional recycling, treatment and disposal practices.
- To provide a forum for the encouragement of technical advancements which improve the safety, efficiency and overall economy of the environmental service industry, and to develop standards for the industry.

# About OESI

## Officers and Board Members

OESI is governed by a board of directors and officers who are elected every two years. The officers and directors listed below will govern OESI from January 2008 through December 2009.

### Board President (Active)

Steve Lonneman  
*Vickery Environmental, Inc.*

### Board Secretary (Active)

Mike Parkes  
*Von Roll WTI*

### Board Vice President (Active)

Rudy Vingris  
*Veolia ES Technical Solutions*

### Board Treasurer (Associate)

Craig A. Cox  
*Cox-Colvin & Associates, Inc.*

### Board Member (Active)

Rick Timm  
*Chemtron Corporation*

### Board Member (Active)

Nick Maoloni  
*Ross Environmental Svcs, Inc.*

### Board Member (Active)

Rob Hukill  
*Hukill Chemical Corp.*

### Board Member (Associate)

Pat Esposito  
*ETC, Inc.*

## Staff

OESI is coordinated by an executive director/legislative counsel. A legislative aide and an office administrator provide additional support. OESI's headquarters is located in downtown Columbus, at the offices of Thomas P. Pappas and Associates. Please contact Mr. Pappas or his office administrator, Mrs. Dee Smith, if you have questions about membership or meetings.

# About OESI

## Committees

OESI has four committees which carry out the day-to-day activities of the association. They are as follows:

### Legislative

This committee tracks current legislative issues, advises lobbyists on proposed legislation and testifies at hearings as needed.

### Regulatory/Compliance

This committee monitors OEPA's proposed regulations and developing policies. Works with OEPA to ensure fair compliance and enforcement of regulations.

### Communication/Education

This committee coordinates the OESI Annual Report and Membership Directory, the OESI website and other communication/public education activities. Informs and promotes our services to industry, legislature, media and the general public.

### Membership

This committee maintains and expands association membership through personal contacts and attendance at professional environmental symposiums and conferences.

Committee chairs and members are listed below.

#### Legislative:

Rob Hukill, Chair  
Mike Parkes  
Rick Timm

#### Communication/Education:

Pat Esposito, Chair  
Steve Lonneman  
Rudy Vingris

#### Regulatory/Compliance:

Dan McCabe, Chair  
George Colvin  
Rob Hukill  
Steve Lonneman  
Rick Timm  
Nick Maoloni

#### Membership:

Rob Snyder, Chair  
Tom Pappas  
George Colvin

## Legislative Report for 2007

2007 was a transition year for the State of Ohio. Democrat Governor Ted Strickland and Democrat Attorney General Marc Dann were elected to their respective offices. This ended 16 years of Republican control of both the Governor's office and the Attorney General's office. The OESI Legislative Committee began its outreach to the two new office holders in 2007.

### AG Environmental Chief Addresses OESI

OESI members hosted Assistant Attorney General, Dale Vitale, to discuss the new administration, and specifically, the office's environmental background investigation unit. OESI began its dialogue with the new Attorney General's office regarding streamlining the background investigation process and information requirements. The dialogue will continue throughout 2008.

### New OEPA Director Korleski Speaks to OESI

The administration's new director of the Ohio Environmental Protection Agency, Chris Korleski, spoke to OESI members at its annual spring meeting in April 2007. Throughout the rest of the year, OESI met with other new administration personnel to discuss environmental issues.

### Lead Acid Battery Legislation Enacted

OESI members took part in the legislative debate of HB 169, which became law in 2007. This legislation created a statutory process for proper lead acid battery disposal. OESI suggested an amendment that was adopted, which allows its members to continue receiving and properly disposing of lead acid batteries as part of their business mission.

### Political/PAC Activities

Throughout 2007, members attended events to raise money for the association's political action committee, OESI-PAC. The OESI-PAC is a tool that allows the association to support legislators and statewide officials who understand the hazardous waste industry and support pro-business public policy. OESI-PAC events are held quarterly after each general membership meeting.

### Annual Statehouse Legislative Reception

OESI held its annual legislative reception for all members of the Ohio General Assembly on April 17, 2007. The reception was held jointly with the National Solid Waste Management Association. The event is important because it provides legislators and government officials the opportunity to meet OESI members, learn more about the association, and understand the critical role members have in the Ohio's economy. The annual statehouse legislative reception was very successful and was attended by nearly 60 legislators, legislative staff, and administration officials.

# Annual Report

## OESI Facility Visits

Members of OESI hosted legislators at their facilities throughout 2007. Facility tours are a tool to better educate legislators about the nature of the hazardous waste industry and the vital role that it plays in Ohio's manufacturing economy.

## Legislative Agenda for 2008

2008 will be an election year for all the members of the Ohio House of Representatives and half the members of the Ohio Senate. The OESI Legislative Committee will continue focusing on grassroots efforts, in addition to concentrating on specific legislative efforts. Our grassroots efforts will include:

- Meeting with key members of the Ohio Senate, Ohio House of Representatives and state officials to educate them on OESI's mission and to raise awareness of the Association and our members.
- Invite local officials to tour active member facilities to demonstrate the key role each facility plays in Ohio's economy.

In 2007, OESI put together a plan to reduce state and local government regulations and restrictions on their facilities. Members decided that the cost and time involved in yearly background investigations was their number one concern and have made that their top legislative priority for 2008. Members continue to update their facilities with the best available technology while the laws and regulations remain rooted in the past. These laws and regulations have an unnecessary and costly impact on business operations, and need to be revised.

- Members of OESI are interested in modernizing the process of annual background investigations. The process required by each "key employee" takes a significant amount of time even if the employee has completed the background investigation in the past. In addition, members also believe the fees associated with the background investigations should be reduced.

# Annual Report

## OEPA Division of Hazardous Waste Management Retreat

OESI plans to attend the 2008 OEPA Division of Hazardous Waste Management Retreat in the fall of 2008. The retreat gives members an opportunity to sit as a panel before OEPA Hazardous Waste Management officials and representatives from across the state and informally discuss concerns affecting the industry, as well as the agency.

## Increase Political and PAC Activity

Members of OESI have multiple events planned in 2008 to help raise money for the OESI-PAC. Events include dinners, an auction, and a well-attended bowling event.

## Annual Statehouse Legislative Reception

OESI will hold its annual legislative reception for all members of the Ohio General Assembly in April 2008, including a joint reception with the National Solid Waste Management Association. The reception helps raise awareness of Ohio's environmental service industries. The legislative reception will also provide an opportunity for members to meet their local legislators as well as members of the House and Senate Environmental Committees.

## Regulatory Report for 2007

The Regulatory Committee remained busy throughout 2007. Highlighted below are issues the association addressed.

### Roundtable Meetings with OEPA, Division of Hazardous Waste

OESI conducted quarterly Roundtable Meetings with OEPA officials to discuss regulatory and compliance issues. A formal agenda was compiled before each meeting in order to clearly identify the concerns of the members, and to help select the correct officials to invite for each discussion. These routine meetings provide both OESI and OEPA the opportunity to address regulatory concerns and issues in an informal setting.

### Requirement for Un-manifested Wastes

OESI members had several meetings with OEPA officials regarding un-manifested wastes reports and when they are required. OEPA representatives indicated that un-manifested waste reports should be filed by a destination facility whenever it receives non-hazardous waste that is subsequently identified as hazardous. The agency has instructed facilities to include non-hazardous waste

that is identified on a hazardous waste manifest, as well as, non-hazardous waste that is part of shipment that is accompanied by a hazardous waste manifest.

# Annual Report

## Annual RCRA Reporting Software

In 2007, OESI members worked with OEPA Officials to make updates for the annual RCRA reporting software more efficient and effective.

## Regulatory Agenda for 2008

OESI members have prepared a list of regulatory issues to focus on in 2008, and will continue its quarterly regulatory roundtable meetings with the OEPA throughout 2008.

### Administrative Code Definitions Regarding Time Frames

Definitions for regulatory compliance terms, such as 'daily', 'weekly', 'monthly', 'quarterly', 'semi-annually' and 'annually', need to be consistent and practical for OESI members, OEPA inspectors, and permit reviewers. OESI members have proposed to the OEPA an administrative code amendment to uniformly define these time frames and improve consistency in regulatory compliance.

## Communication Report for 2007

The Communication/Education Committee continued its outreach program to inform legislators, businesses, and the public about OESI's mission, members, and hazardous waste management services. Outreach activities during 2007 are summarized below:

### Website

OESI continued to maintain its public information website, [www.oesionline.org](http://www.oesionline.org). This site features all OESI members and associate members, as well as news related to the management of hazardous wastes. The website includes links to federal and state agencies that regulate hazardous waste. OESI's annual report and membership directory are also available at the website to review or download.

# Annual Report

## OESI Trade Show Exhibit

In March 2007, OESI participated as an exhibitor at the 16th Annual Business and Industry's Environmental, Health & Safety Symposium in Cincinnati. This symposium attracts hundreds of environmental scientists, engineers and managers from the tri-state area, and provides a valuable venue for informing them about the services OESI members provide.

In April, 2007, OESI also showcased its trade show exhibit at the annual Statehouse Legislative Reception in Columbus, Ohio, in an effort to further familiarize state legislators with the OESI organization, its members, and its mission.

## Annual Report and Membership Directory

OESI issued its fifth combined Annual Report and Membership Directory in April 2007. This report recounts the legislative, regulatory, outreach, and other activities of OESI members and committees over the year. It also includes a directory of hazardous waste management and related services provided by each member and associate member.

## Legislative Reception and Legislative Updates

In April 2007, OESI and the Ohio Chapter of the National Solid Waste Management Association co-hosted a reception for Ohio legislators at the Capital Club in Columbus. This important annual event provides an opportunity for OESI members to speak directly with legislators about their facilities and operations.

Throughout the year, OESI's executive director tracked legislative activities at the statehouse that could impact member operations, and issued updates by email to the members.

# Annual Report

## Scholarships

A new outreach initiative was launched in February 2007 when OESI established an Annual Scholarship Fund at the University of Findlay. The fund provides four annual \$1,000 scholarships for students pursuing an undergraduate degree at the School for Environmental and Emergency Management. The first round of scholarships was awarded in August 2007 for the fall session. OESI is committed to and supports education and training for future generations of professionals seeking careers in the hazardous waste industry.

## Communication Agenda for 2008

In 2008, OESI will continue the outreach activities outlined above, including continuation of the new scholarship program for students pursuing environmental degrees.

## Membership Report for 2007

Membership remained steady in 2007 at 11 active members and 14 associate members.

“OESI is a place where important issues that affect the hazardous waste management industry are being discussed, and where the professional community can gather for regulatory and legislative input,” said Membership Committee Chair Rob Snyder.

## Membership Agenda for 2008

In 2008, the OESI Membership Committee will continue to seek new members to expand the Association’s foundation. So far, one new associate member, Value Recovery Partners, has joined OESI during the first quarter of 2008, and others are anticipated as the year progresses.

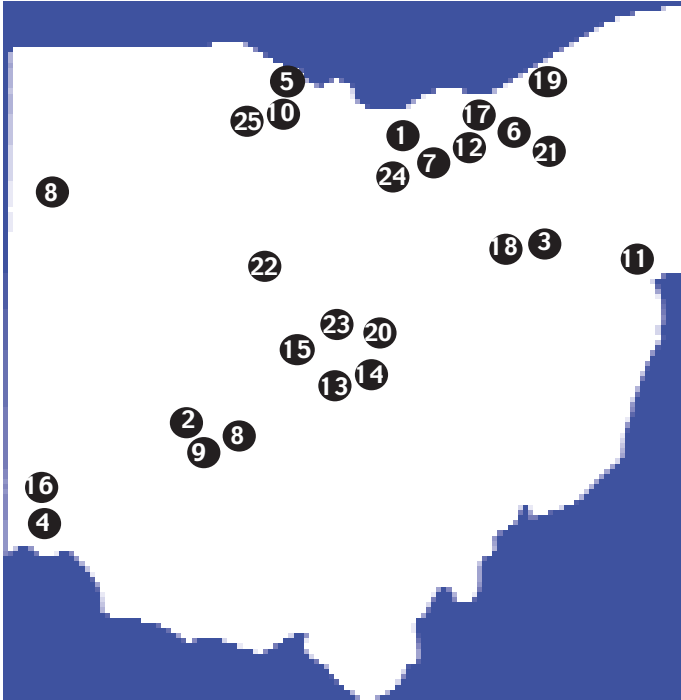

OESI provides opportunities to discuss member concerns with legislators, OEPA staff and key administrative officials. The Association also represents its members at various trade shows and symposiums each year.

If you are interested in being a guest at the next OESI quarterly meeting, please contact the Membership Chair, Rob Snyder.

### Chemtron Corporation

Chemtron is a fully licensed and RCRA Part B-permitted facility strategically located near Cleveland in proximity to major interstates. We are a premier provider of environmental services to an array of industries both private and public. Having operated for over 30 years, we continue to lead the environmental industry through innovative practices and a strong commitment to our core business. Offered are total environmental solutions ranging from ordinary to even the most challenging. At Chemtron our people make the difference. TEAM CHEMTRON is comprised of the most highly trained, experienced, and ethical professionals within the industry.

Chemtron is positioned to efficiently provide service to waste generators of all sizes with a large variety of needs. We are committed to earning and maintaining your business. We take pride in knowing that our clients recognize us as "a cut above." Feel free to contact our offices for more information and our professional staff will provide a step-by step guide to solving your needs.

## Clean Water Ltd.

Clean Water Ltd. (formerly Perma-Fix of Dayton, Inc.) is a RCRA permitted Hazardous Waste Treatment, Storage and Disposal Facility, providing comprehensive waste management services.

Clean Water Ltd. has facilities in Columbus, Mansfield and Dayton, Ohio that offer a wide range of services for both hazardous and non-hazardous wastewaters, as well as

recycling and recovery of waste oils and oily waters. Three centrally located facilities reduce transportation expense.

The Dayton facility has one of the largest commercial biological treatment systems in the state of Ohio, for the treatment of wastewaters. Other services include on-site management of hazardous and non-hazardous wastes, field services, transportation and analytical services. Clean Water Ltd. is committed to providing the best service and competitive pricing to our customers while protecting the environment.

## Envirosafe Services of Ohio, Inc.

Engineering and Science Providing Responsible Technological Solutions. That's us. Envirosafe Services of Ohio, Inc. is an industry leader in providing customers with specialized expertise in stabilization and landfilling of environmentally sensitive wastes and by-products. The company offers a fully enclosed, high-capacity, Part B-permitted waste treatment facility, RCRA Subtitle C landfill capacity, analytical services, transportation, and total waste management services to meet your needs.

Envirosafe utilizes a patented treatment process called Super Detox® to treat electric arc furnace (EAF) dust, a hazardous waste collected in the air pollution control systems of steel “mini-mills”. Envirosafe is a leading provider for the management of EAF dust in the country. Envirosafe also

continues to use its experience and knowledge to provide stabilization treatment and disposal services to incinerators, waste consolidators, and multi- and single-source generators.

*Serving Industry and the Environment*

## Hukill Chemical Corporation

Hukill Chemical Corporation is a privately owned and operated chemical company offering a variety of products, recycling options and waste management solutions to our customers. Our knowledgeable and experienced staff provide cost effective and innovative solutions to help our customers manage the environmental and regulatory challenges of chemical use and waste management.

Hukill is a distributor of chemical products from major manufacturers, as well as a custom formulator and blender, offering small and large quantities in addition to custom packaging. We specialize in solvent reclamation; providing a high quality recycled product at substantial savings, reducing our customer's waste disposal costs, and complying with resource recovery and waste minimization requirements. As a RCRA permitted TSD (Treatment, Storage and Disposal Facility), Hukill Chemical provides a comprehensive waste management program. Hazardous and non-hazardous waste streams are reviewed and accepted for processing or disposal. Waste materials are blended for supplemental fuels conversion and energy recovery whenever possible. Our fleet of tank trailers and vans help service and accommodate our customers' chemical transportation needs.

### Ask us about our:

- Chemical distribution
- Fractional distillation

## Ross Environmental Services, Inc.

Ross Environmental Services, Inc. has been a pioneer in hazardous and industrial waste management for more than 59 years. The RCRA Part-B permitted company provides a full breadth of environmental services through the utilization of state-of-the-art technologies with superior customer service.

Ross Environmental can seamlessly meet your environmental service needs. The company offers a full complement of services and technologies through its affiliated companies, Ross Incineration Services, Inc. and Ross Transportation Services, Inc., and can partner with you to be your Single Source Supplier.

The Ross Companies have kept pace with changes in the environmental service industry by continuously improving their operations and expanding service offerings. The companies have also continuously reinvested in their facilities and operations. For instance, Ross Incineration

Services has reinvested more than \$35 million in its facilities over the past 20 years. Most recently, the company completed an extensive project to replace its air pollution control equipment.

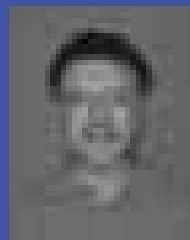

Ross Transportation Services has also incorporated the latest transportation equipment into its operations. The company prides itself on its outstanding Safety Record.

### Ask us about our:

- *Incineration*
- *Flexible processing capabilities*
- *Wide range of waste types*
- *RCRA & CERCLA cleanup wastes*
- *Transportation authority in 40 states, hazardous waste authorized in 32 states*
- *Extensive transportation fleet*
- *Full turn-key field services*
- *Environmental training & consulting*
- *Inorganic/organic WWT*
- *Stabilization and landfill*
- *Fuel blending*
- *Lab Packs*
- *Metals recovery*
- *Deep well injection*
- *Gas cylinder recycling*
- *Recycling and disposal*

## Systech Environmental Corporation

Systech Environmental Corporation procures and manages fuel-quality waste (FQW), tire-derived fuel (TDF), alternate solid fuels (ASF) and alternate raw materials for cement kilns. The materials are used in place of nonrenewable fossil fuels such as oil, coke and coal (fuels) and limestone, shale, alumina and silica (raw materials). The process is called co-processing and is a form of industrial ecology: using waste by-products from one industry to make the product of another.

Systech is a wholly owned subsidiary of Lafarge North America Inc., a group member of Lafarge S.A., a world-wide producer of cement and construction materials. Founded in 1969, Systech initially offered engineering consulting services to state, municipal and federal agencies as well as industry. In

1979 the company began its first FQW operation in Paulding, Ohio. Much of the scientific data used to establish regulatory standards for using wastes as fuel in kilns was gathered at Systech and Lafarge facilities.

### Ask us about our:

- Energy recovery from fuel-quality waste in cement kilns
- Processor of fuel-quality waste since 1979
- 2 wet process kilns
- 100% substitution rate permitted on both kilns

POC: Jeff Hunyor, Ext. 23

## Veolia ES Technical Solutions

Veolia ES Technical Solutions, L.L.C. (VES-TS) has over 30 years experience in the hazardous waste industry and 1,700 employees at 47 sales, service and treatment and disposal facilities located throughout the U.S. convenient to most industrial facilities. Services include a focus on 'Turning waste into a resource' through recycling as evidenced by four energy recovery locations, seven recycling facilities for solvents and acids, four lighting and electronic waste recycling facilities, two incineration locations, 15 permitted TSDF's and 36 10-day in transit locations. Visit us on the web at [www.veoliaes-ts.com](http://www.veoliaes-ts.com).

VES-TS is one of four business units of Veolia Environmental Services North America Corp. (VESNA). Its sibling businesses are Solid Waste, Industrial Services and Waste-To-Energy. VESNA is part of the Veolia Environmental Services (VES) group, the only global manager of liquid, solid, non-hazardous and hazardous waste; on-site waste processing, industrial cleaning and process maintenance; and recycling, recovery and disposal for both the public and private sectors. VES has over 80,000 employees in 35 countries and posted revenues of \$9.8 billion in 2006. Veolia Environnement (NYSE:VE), the parent of VES, with operations in water, waste, energy and transportation, has more than 300,000 employees in 67 countries and recorded revenues of \$37.7 billion in 2006. For more information, visit [www.veoliaes.com](http://www.veoliaes.com).

Ohio is home to Veolia ES Technical Solutions', Ohio Valley Branch headquartered in West Carrollton, OH. Technical Solutions provides a broad range of hazardous and non-hazardous waste management services to Ohio's industrial and commercial waste generators. The Ohio Valley Branch employs more than 80 Ohioans and is an active member in the community.

### Ask us about our:

- *Haz/Nonhaz Waste Processing*
- *Solvent Recovery and Recycling*
- *Fuel Blending*

### Vickery Environmental, Inc. – Waste Management, Inc.

Vickery Environmental, Inc. is a unique RCRA Part-B permitted facility that specializes in deepwell injection for industrial wastewater disposal. By using deepwell injection, Vickery can provide its customers with a "rock solid solution" to their hazardous and non-hazardous wastewater disposal needs.

Located in northwestern Ohio, near the Ohio Turnpike, this state-of-the-art facility is situated on 500+ acres in the rural community of Vickery. Our customers enjoy convenient highway and rail access to the facility and cost-effective receiving, storage and disposal services. They also rely on the friendly, professional staff that operates the facility, and the financial assurance that comes from being a part of Waste Management, Inc.

Vickery can accept nearly all types of hazardous and non-hazardous aqueous wastewater from industrial operations, including those subject to Land Disposal Restrictions.

Waste Management, Inc. is its industry's leading provider of comprehensive waste management services. Headquartered in Houston, Texas, we protect the quality of life in many communities, providing waste solutions to approximately 25 million residential and two million commercial customers in North America.

#### **Ask us about our:**

- *Deepwell injection*
- *Treatment, storage and disposal of aqueous hazardous and nonhazardous waste*
- *Bulk quantities by tank trucks and totes*

## WTI

WTI is a Part B-permitted facility that incinerates RCRA and CERCLA wastes, non-hazardous and consumer commodities, bulk and containerized wastes and lab packs. The company also offers industrial maintenance.

WTI's advanced technology is the first to successfully demonstrate compliance with the U.S. EPA's latest clean-air standards, known as the Maximum Achievable Control Technology (MACT) rule. The facility is also the first in the industry to hold third-party registrations to the ISO 14001 and ISO 9001 quality standards.

The company earned national certification from the National Wildlife Council for its onsite wildlife habitat. WTI received the BEST Practice Award from the Columbiana County Education Service Center for its partnership with the Wellsville Local Schools in creating Project PRINCE, a unique learning opportunity for the district's students. The company also received the Frost and Sullivan Award for customer service leadership and the Blue Chip Award from the U.S. Chamber of Commerce and Mass Mutual.

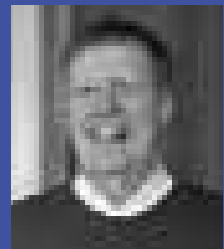

WTI's award-winning services are cost effective, environmentally sound and easy to use. Find out more about the company at [www.heritage-wti.com](http://www.heritage-wti.com).

### Ask us about our:

- ISO 9001 & 14001 certified, Part B-permitted facility offering the following incineration services:
- RCRA & CERCLA wastes
- Non-hazardous and consumer commodities
- Bulk solids
- Bulk liquids
- Drums and containers: pails to cubic-yard boxes
- Lab packs
- Field services for lab packs
- Direct-to-kiln feed capabilities
- Audit and waste-profile assistance
- MACT ready
